Education

School of Economics and Business Oct 2018 – Jul 2021
Bachelor's degree, Business/Commerce Ljubljana, Slovenia

Employment

Freelance & Contract Work Sep 2025 – Present

I design and deliver end-to-end automation and integration solutions for clients across different industries, working primarily with platforms such as **Boomi**, **SnapLogic**, **n8n**, **Zapier**, **Workato**, and much more. My work focuses on connecting fragmented systems—CRMs, ERPs, internal services, databases, and third-party APIs—into reliable, maintainable workflows that support core business operations.

I am involved from the earliest stages of each engagement, translating business requirements into technical architectures and selecting the most appropriate platform based on scalability, cost, and long-term maintainability.

Beyond implementation, I advise clients on automation strategy, identify opportunities for process optimization, and refactor existing integrations to improve performance and resilience.

Senior Integrations & Automations Specialist | Freelance Mar 2026 – Present | Remote
Ralabs

I configure end-to-end workflows that bridge the gap between business processes and technical execution. Utilizing n8n, Workato, Make, Zapier, and more, I build resilient integrations and API connections that eliminate manual friction and ensure data integrity.

Skills

- SnapLogic
- Workato
- Boomi
- Celigo
- Clay
- n8n
- Make.com
- Zapier
- REST/SOAP
- JSON
- XML
- JavaScript
- RDBMSs
- iPaaS Architecture
- Agentic AI

Certificates +more

- SnapLogic Integrator
- Workato Enterprise Automation
- Workato Agentic AI
- Boomi Professional Integration Developer
- Boomi Associate Integration Architect
- Boomi Professional API Management
- Celigo Builder Core
- Make Advanced
- ClickUp Expert
- Kong Gateway Foundations
- Airtable Builder Certification

Automation & Integration Expert | Freelance Oct 2025 – Present | Remote

Thinkual

I specialize in complex ClickUp migrations that exceed the capabilities of native integrations. Leveraging deep automation expertise, I design bespoke workflows tailored to specific industry needs using n8n, Make, Workato, and Zapier to drive digital transformation.

Automation & Integration Specialist | Freelance Mar 2026 – Present | Remote

Jealite

Driving marketing efficiency through custom-built automation and advanced systems integration. I specialize in leveraging n8n, Workato, Zapier, and more to transform fragmented business processes into high-performance, automated processes.

General Manager | Full-time Mar 2026 – Jun 2026

Jupiter BPO Bitola, North Macedonia

I oversee a team of over 50 people, ensuring operational stability and maintaining high resource quality across all client engagements. I leverage my background in integrations, automation, and AI to modernize internal policies and standards, helping the organization optimize efficiency and stay ahead of industry benchmarks.

Senior Integration Specialist | Full-time Jun 2025 – Sep 2025

Remote

Integrera

- Delivered integrations using a custom JavaScript-based integration platform, focusing on script-driven workflows instead of low-code tooling.
- Developed complex **JavaScript integration scripts** to orchestrate data flows between multiple systems and APIs.
- Implemented business logic, data transformations, and conditional routing directly in code.

Celigo Developer | Freelance Feb 2025 – Aug 2025

able.digital Remote

- Worked exclusively on **Celigo** projects, delivering integrations for **eCommerce, ERP, and SaaS platforms**.
- Implemented error handling, data validation, and monitoring strategies to ensure **stable, production-ready integrations**.
- Collaborated with stakeholders to gather requirements and optimize existing integrations for **performance and maintainability**.

IWConnect

> **Intermediate Technical Consultant | Full-time** Jun 2024 – Feb 2025
>
> Bitola, North Macedonia
>
> - *Technical Consultant responsibilities +*
> - Acted as a technical point of contact for clients, **translating business requirements into integration designs**.

Additional Skills

- Web Design
- Business Operation
- Technical Writing
- Content Marketing
- Go-to-market proficiency

- Participated in solution design sessions, contributing to scalable and reusable integration patterns.
- Improved reliability and observability of integrations through **logging, error handling,** and **retry mechanisms**.
- Supported onboarding of new team members and shared best practices for SnapLogic and Boomi development.

Technical Consultant | Full-time Oct 2021 – Jun 2024
Bitola, North Macedonia

- Designed, built, and maintained system integrations for enterprise clients using **SnapLogic** and **Boomi**, connecting ERP, CRM, and custom internal systems.
- Developed data pipelines and integration flows involving REST/SOAP APIs, JSON/XML, file-based integrations, and database connectors.
- Supported end-to-end integration lifecycle: **requirements analysis, implementation, unit testing, deployment,** and **production support**.
- Worked closely with senior engineers and solution architects, progressively taking ownership of independent integration components.

Highlight Project

"I led the design and delivery of an enterprise-scale automation for a global mass-media and technology organization, transforming a fully manual LMS course creation process into an end-to-end automated workflow. The solution integrated Excel-based course templates with **Workday LMS APIs**, handling complex data parsing, validation, and high-volume processing across a global workforce of 100,000+ employees.

I owned the architecture and implementation using **SnapLogic**, including robust error handling, real-time reporting, and automated escalation. The automation eliminated the need for a dedicated operational team, significantly reduced errors, accelerated course deployment, and provided a scalable foundation for future LMS growth."
